Public Invited.

## A Marvel of Thoroughness

For \$115.00

Sunnysuds  
Electric Washer-Wringer

No dirt can long resist the Sunnysuds. Overalls, dish cloths, bath rugs, obstinately dirty cuff and collar bands, come from the Sunnysuds delightfully clean and stainless. Its large capacity enables heavy blankets to be washed with speed and satisfaction.

When in motion, the tub rocks with remarkable silence, when stopped, it locks in the proper position to be opened for wringing.

The polished interior of the tub contains no angles, or sudden projections. There are no paddles or mechanical agitators to cause tangles.

The Sunnysuds works on a perfectly natural principle that happily combines thoroughness and gentleness.

Examine the tub and see. Demonstrations will be cheerfully made at anytime. If you have been waiting to buy a high quality, all-metal Electric Washer for \$115.00 the Sunnysuds awaits you.

## DRUG HABIT HAS BECOME BIG MENACE

More Users In Montreal  
Than Elsewhere In  
Canada

Dr. J. G. Shearer, secretary of the Social Service Council of Canada, who was recently a speaker at the social service conventions held in Sherbrooke, has accumulated some very interesting information relative to the traffic in such habit forming drugs as opium, cocaine and morphine. This traffic has assumed such alarming proportions and has become so difficult to suppress, causing such grave havoc physically, mentally, and morally, to its enslaved victims that it has caused grave concern to both Church and State.

"Parliament is always unanimous," stated Dr. Shearer, "in making the Opium and Narcotic Drug Act more stringent and effective. The only question raised by members in the Commons or in the Senate is how best to accomplish the end sought. The present Premier, Right Hon. W. L. Mackenzie, then Minister of Labor, introduced the Act in 1911. It has been strengthened since under the Right Honorables Sir Robert Borden and Arthur Meighen and last session under the Hon. H. S. Beland, Minister of Health. The penalty was raised to seven years. Whipping was added where drugs are supplied to juveniles, and unauthorized aliens convicted of offenses were ordered deported after serving sentence. "It is interesting to note the distribution of this traffic in the Provinces of the Dominion. The very latest figures supplied by the Federal Department of Health giving the numbers for Federal convictions for the year ending March 31, 1922, are as follows:

	Total	Chi- nese	non Chi- nese
P. E. Island	0	0	0
Nova Scotia	0	0	0
N. Brunswick	14	0	14
Manitoba	16	0	16
Ontario	26	52	14
Saskatchewan	88	73	15
Alberta	101	59	42
Quebec	237	133	104
B. Columbia	315	300	15
Total	845	634	211

We have arranged these figures in ascending scale.

"The first fact that stares one in the face is the tremendous proportion of Chinese in this summary of offenders 634 out of 845. The new law attaching deportation as a penalty will probably in a few years materially alter these figures. It is likely that many, perhaps most of the Chinese offenders are not Canadian citizens and are therefore subject to deportation when convicted. These must either mend their ways or leave Canada.

"It is interesting to note that no mention is made of Japanese or East Indians in this statement.

"It is sometimes argued by those opposed to prohibition of the traffic in intoxicants that it results in increased addiction to the use of drugs. These official figures effectively knock the props from under this contention. The two provinces not under prohibition show 552 convictions out of 845 for all Canada. If the Chinese are left out the figures are 119 in these two provinces out of 211 in all Canada.

"Prohibition may not lessen the use of drugs but it certainly does not increase it. British Columbia's quota of 15, omitting the Chinese, who are more numerous there than in any other part of Canada, is not abnormally large, being the same as Manitoba's and Saskatchewan's. But it is singular that in all the Western Provinces leaving out the Chinese, the convictions are proportionately much larger than in Ontario, and the Maritime Provinces. Manitoba, Saskatchewan and British Columbia have 15 each and Alberta 12; Ontario 14 with a population of half a million more than the four combined.

"The case of Quebec is also not easily explained. Two hundred and thirty-seven, including Chinese, or 104 not including them, is abnormal. This is certainly not to be charged up to the French Canadians. Out of the 237 in that Province only 21 are outside Montreal, in an almost solid French population, and of these 21 only 11 are non-Chinese. This is highly creditable to Quebec outside Montreal. Montreal itself is the most perplexing. The Health Department's more complete report gives Montreal 216 including Chinese, or 92 without them in a population of perhaps 750,000. Compare this with the figures of the whole of the Maritime Provinces, 25 including Chinese, or 6 without them, out of a population of 1,000,000. Or compare it again with Ontario convictions, 106 including Chinese, or 14 without them, out of a population of not much less than 3,000,000.

"This can hardly be explained by the cosmopolitan character of Vancouver and other cities are Montreal's population. Winnipeg Vancouver and other cities are quite as cosmopolitan in proportion to population as Montreal. And there is no finer type of population anywhere than the people of Montreal in general.

"Montreal has had for many years an abnormally large and at least negatively tolerated colony of criminals, that is, commercialized social vice, as the reports of the Montreal Committee of Sixteen conclusively show.

"Bearing in mind that social vice

## WORKING GIRLS LOOK HERE

Read what Mrs. Lucas Writes Concerning Her Troubles, which May be Just Like Yours

St. Louis, Mo.—"I had troubles that all women are apt to have, with pains in my back, weak, tired, nervous feelings and a weak stomach. I had been this way about a year and was unable to work or stand on my feet for any length of time. My husband's aunt told me how much good Lydia E. Pinkham's Vegetable Compound had done her. My pains and weakness are gone, my stomach is all right and I can work at home and also work for Swift's Packing Company. I recommend your Vegetable Compound to my friends and you may publish my letter, and testimonial."

—Mrs. L. E. LUCAS, 7784 Vandewater St., St. Louis, Mo. Again and again one woman tells another of the merit of Lydia E. Pinkham's Vegetable Compound. You who work must keep yourself strong and well. You can't work if you are suffering from such troubles. Mrs. Lucas couldn't. She tried our Vegetable Compound and her letter tells you what it did for her. Give it a fair trial now.

and narcotic drugs are twin evils and both companions each the cause and the effect of the other, is the explanation in whole or large part to be found in this fact."

MONTREAL, Oct. 28.—Denial of the execution recently made that the drug habit was largely due to suppression of liquor facilities was made here by Rev. Dr. J. G. Shearer, of Toronto, general secretary of the Social Service Council of Canada, in discussing a resolution moved at the annual meeting of the Quebec Provincial Social Service Council.

In support of this contention the speaker stated figures showing that importation of drugs into Canada had fallen from 12,333 ounces of cocaine in 1919 to 2,352 ounces for the last fiscal year, with proportionate fall in the figures for allied drugs.

Convictions for offenses against the Narcotic Act were, he said, as follows: In 1919, 231; last year, 845. Prince Edward Island, 0; Nova Scotia, 14; New Brunswick, 16; Manitoba, 16; Ontario, 26; Saskatchewan, 88; Alberta, 101; Quebec, 237; British Columbia, 315.

Thus the two provinces not under prohibition supplied 4-2 of these cases. Considering how the women folk of Northwestern Vermont are going ahead, it is evidently only a few years before they will be lounging down the streets with their hands in their trousers' pockets.

## PROPERTY ESCAPES TAXATION

More Than One-half of  
Total Gets Into Exempt  
Class

The special committee of the State Farm Bureau Federation which has been conducting the recent taxation study in Vermont has been in session in Burlington for two days. As a result of this meeting, there has been prepared and submitted to the executive committee of the Vermont Farm Bureau Federation, which met at Burlington a report on needed tax legislation, proposing to broaden the basis of taxation to include much property that has hitherto yielded no revenues to the State. Investigations have shown that less than one-half of the property owned in the State is taxed. It is the purpose of the friends of this proposed reform in taxation to insist upon a fair and equitable distribution of the tax burden, and it is expected that property owners in the intangible class will welcome the opportunity for sharing in the expenses of the State and local governments under an arrangement that does away with the present unfair discriminations.

The Vermont Farm Bureau Federation tax committee which is made up of E. B. Cornwall of this city, C. W. Fitch of East Montpelier and James Leach of West Rutland, recommended to the executive committee of the organization that a bill be drafted immediately along the line of those laws in other States that have successfully dealt with the class of property and that the same be submitted to experts for criticism.

At the meeting of the executive committee of the Vermont Farm Bureau Federation this recommendation was accepted and the committee ordered that such a bill be drafted at once and subjected to criticism by taxation experts, after which it will be presented to the coming annual meeting of the Vermont Farm Bureau Federation.

Other business transacted by the executive committee included the authorization of a statement from the Vermont Farm Bureau Federation in answer to Congressman Frank L. Greene on the question of his vote on the potash matter. E. L. Brigham, commissioner of agriculture, met with the executive committee and outlined the work that is being done for the eradication of bovine tuberculosis in Vermont, answering many questions as to the cost of various branches of the work and future plans in this department.

## South Ryegate

Miss Mabel Hall of South Ryegate, aged 44 years, died Monday afternoon at the hospital in Brookline, Mass., where she went last week for treatment. The funeral was held at the home Thursday afternoon at 2 o'clock, the Rev. W. T. Bailey officiating.

Miss Hall was the daughter of George L. and Eliza (Lauder) Hall and had always made her home in South Ryegate. Although teaching for a time in Newbury, most of her life was spent in the home, caring for her mother, who died nearly two years ago. Mr. Hall is also deceased. For the past year Miss Hall's health had been impaired and for two months she was in Brightlook hospital, St. Johnsbury, for treatment, going from there to Brookline for further care. Two sisters survive, Miss Marion Hall of South Ryegate and Miss Elizabeth Hall of Minneapolis.

## SUNNY SQUIBBLETS

Many voters feel it is not necessary to read the political news, as the bosses will tell them how to vote.

Many people not so much interested in the affairs of the nation since the candidates have discontinued hiring political workers.

## "COLD IN THE HEAD"

is an acute attack of Nasal Catarrh.

Those subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the System and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh.

HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous surfaces of the System, thus reducing the inflammation and assisting Nature in restoring normal conditions.

## Desire Upholds Business

The basic changes that have taken place in business during the past year or more—specifically the change in price levels and price tendencies—have caused business men everywhere to think less superficially and more fundamentally about business.

Great basic facts which were but little realized, except by thinkers along economic lines, have now become clearer to the public at large, and to business leaders in particular.

One such fact is that Desire is the foundation of business. It is the desire of the people for any article of commerce that makes it profitable to produce it. When that desire fails all the agencies of its production must cease to operate.

This fact was considered academic until the nation-wide cessation of liberal buying made it a matter of cardinal importance, and the question of the hour became the means, if any, of restoring the popular desire to do business—the desire to buy.

It came to be seen that the public desire for the products of a business or an industry was the only real and permanent asset.

## Good Jobs Don't Just Happen

Do not rely upon luck or accident to get you a good paying position. The reason we hear so much about luck is because it is the exception and not the rule. It is unusual, therefore talked about.

No one need complain about their inability to secure employment. Competent help is at a premium; any number of offices, factories and general business concerns in this city would be glad to employ you if they knew you were idle. Get busy and read the HELP WANTED ADS today.

CALEDONIAN-RECORD.

Every other assumed asset became a liability when that desire subsided.

It is upon this basic fact that Advertising rests.

It is the function of Advertising to create desire.

The desire that is created by Advertising is always some specialized form of an elemental need. Elemental needs, in their simple form, are the raw material out of which must be created the Demand for the products of industry. This Demand, in its turn, upholds civilization itself. It is the one necessary thing that inspires all human activity.

It is the function of Art and Industry to take the raw materials of nature, and refine them into products that constitute Supply. It is the function of Advertising to take the raw materials of elemental need for food, shelter, and clothing, and refine them into the desires for the finest products of Art and Industry, and these desires constitute Demand. Each function is as important as the other. And now the time has come when this fact is realized as never before.

(Published by the Caledonian-Record, in co-operation with The American Association of Advertising Agencies)
